EDUCATION

University of Texas – Austin

B.S. in Computer Science, B.S. in Mathematics (Double Major)

Austin, TX

Expected: May 2027

GPA: 3.6

Relevant Courses: Computer Architecture, Probability 1, Operating Systems, Applied Statistics

EXPERIENCE

Fidelity Investments

May 2025 – Aug 2025

Software Engineering Intern (MLOps)

Westlake, TX

- Migrated legacy pipeline to **automated anomaly detection** algorithm for ServiceNow tickets with **LSA** text-to-vector labeling; achieved **77%** classification accuracy using HDBSCAN clustering
- Deployed **model monitoring** for business impact clustering algorithm; reduced latency by **70ms** across **10,000+** tickets monthly; followed **Agile Scrum** methodology in weekly stand-ups

Kinetik Gigs

Aug 2024 - Jan 2025

Software Engineering Intern

Berkeley, CA

- Migrated and designed backend architecture for distribution of over **10 MVPs** from legacy to Flask microserver; onboarded **three** clients, increasing total startup revenue by **10%**
- Implemented full-stack design for developer submissions webpage with **Next.js** and **React.js**; reduced Firebase usage by **22%** through REST API monitoring

COVIS Lab – University of North Texas

Aug 2022 - May 2024

Undergraduate Research Lead

Denton, TX

- Aided design of **human tracking model** with an improved classification rate by **12%** through development of a **point-cloud generation tool**
- Created **train and test set database** containing **1500+** auto-generated samples with a custom MATLAB video-frame generator application

CAMPUS INVOLVEMENT

Longhorn Eats | React Native, Flask, GCP, PostgreSQL, LangChain

Aug 2024 – Present

- Deployed mobile dining app at UT Austin, scaling to **3000+** users
- Built **RAG** chatbot for personalized meal plans with **84%** accuracy; reduced response latency by **22s** via parallelized nutrition data scraping

PERSONAL PROJECTS

Longhorn Lunch | NextJS, React, AWS, Flask, Supabase, PostgreSQL

May 2024 – Aug 2024

- Developed real-time **Next.js** dining web app with total **2000+** student visits
- Reduced operational expenses from **\$55** to **\$1** through database migration from legacy to **AWS**; decreased Lambda calls by **22.5%** through AWS Lambda Layering

Algorithms For Stock Analysis | Python, TensorFlow, Pandas, YFinance

May 2024 – Dec 2024

- Designed **seven** backbone trading bots with average **\$2000** in simulation profit after **LSTM** market analysis

MedBot (Hack) | Flutter, Python, Jupyter, HuggingFace, Supabase, MongoDB

Oct 2023 – Nov 2023

- Designed an **iOS medical AI assistant** with **92%** accurate NLP diagnosis model; received **first** out of **693** participants in **Google All-Inclusive Hacks**

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, TypeScript, Dart, MySQL (Postgres), Swift, HTML/CSS

Frameworks: Next.js, React.js, Node.js, Flutter, Flask, TensorFlow, LangChain, Pandas, NumPy

Services/Technologies: AWS Cloud, GCP, Azure, Postman API, Git, GitHub, Supabase, CI/CD
