EDUCATION

University of Texas – Austin

B.S. in Computer Science

Austin, TX

Expected: May 2027

GPA: 3.5

Relevant Courses: Data Structures and Algorithms, Computer Architecture, Operating Systems, Applied Statistics

EXPERIENCE

CodeFour (YC X25)

Software Engineering Intern

Aug 2025 – Oct 2025

San Francisco, CA

- Developed a **RAG chatbot** enabling Wisconsin police officers to semantically search legal documents with source citations; optimized document ingestion for **71% accuracy** in correctly classifying and returning legal references
- Engineered real-time body-cam **transcription and summarization** system, achieving **84%** accuracy on V1

Fidelity Investments

Software Engineering Intern (MLOps)

May 2025 – Aug 2025

Westlake, TX

- Migrated legacy pipeline to **automated anomaly detection** algorithm for ServiceNow tickets with **LSA** text-to-vector labeling; achieved **77%** classification accuracy using HDBSCAN clustering
- Deployed **model monitoring** for business impact clustering algorithm; reduced latency by **70ms** across **10,000+** tickets monthly; followed **Agile Scrum** methodology in weekly stand-ups

Kinetik Gigs

Software Engineering Intern

Aug 2024 - Jan 2025

Berkeley, CA

- Migrated and designed backend architecture for distribution of over **10 MVPs** from legacy to Flask microserver; onboarded **three** clients, increasing total startup revenue by **10%**
- Implemented full-stack design for developer submissions webpage with **Next.js** and **React.js**; reduced Firebase usage by **22%** through REST API monitoring

COVIS Lab – University of North Texas

Undergraduate Research Lead

Aug 2022 – May 2024

Denton, TX

- Led the design of a **human tracking model**, achieving a **12%** improvement in classification accuracy through innovative **point-cloud generation**.
- Created **train and test set** database containing **1500+** auto-generated samples with a custom MATLAB video-frame generator application

CAMPUS INVOLVEMENT

Longhorn Eats | *React Native, Flask, GCP, PostgreSQL, LangChain*

Aug 2024 – Sep 2025

- Deployed mobile dining app at UT Austin, scaling to **3000+ users**
- Built **RAG** chatbot for personalized meal plans with **84%** accuracy; reduced response latency by **22s** via parallelized nutrition data scraping

PERSONAL PROJECTS

PintOS | *C, C++, ASM, x86*

May 2025 – Aug 2025

- Optimized PintOS operating system with multithreading, concurrency, thread protection, and paging system
- Applied multi-level and tree-structured page table with **4 kB** page size, reducing scheduling latency by **40%**

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, TypeScript, Dart, MySQL (Postgres), Swift, HTML/CSS

Frameworks: Next.js, React.js, Node.js, Flutter, Flask, TensorFlow, LangChain, Pandas, NumPy, Tailwind, React Native

Services/Technologies: AWS Cloud, GCP, Azure, Postman API, Git, GitHub, Supabase, CI/CD, MongoDB, Docker
